Let's Get Ahead of the Japanese Beetles

It is often best to put down grub preventers from April through mid-July when grubs are ready to hatch. If you want to stop grub damage right away, the best time to apply a grub killer to your lawn is when you first see signs of damage.

SPRING (April – late May): Apply after ground has thawed to control overwintering grubs that are now migrating to the surface to feed on the roots.

SUMMER (late June – early August): Apply to control newly hatched grub larvae. Should be applied within 2-3 weeks of peak timing for adult beetles.

Weed Removal Reminder

As a reminder, weeds will soon be in full bloom and growing tall! Let's keep our major streets looking good. In particular, for those whose property backs to Sheridan, please don't forget to remove weeds and also the trash on your property between the sidewalk and fence line along Sheridan. Let's do our best to keep our neighborhood looking beautiful --- we all benefit and we all thank you for it!

Neighborhood Planning Initiative

The Neighborhood Planning Initiative (NPI) is a program to cover 100 percent of the city with area plans. Under NPI, area planning occurs according to a consistent, streamlined process common to all plans. The multi-year work program is set on a rolling basis and determined by the planning need of each area. Planning need is assessed periodically using a data-driven process that is described on pages 10 and 11. Once 100 percent coverage of the city is achieved, NPI will continue by cycling back through and updating the completed plans for each area. You can sign up to receive Councilman Flynn's Neighborhood Planning Initiative newsletter by going to his website at <https://tinyurl.com/FlynnDenver>.
