February is Bath Safety Month

This February is Bath Safety month, reminding you to take some extra precautions and save yourselves from home injuries.

Bathing is such a routine activity that we often neglect to take proper precautions while we're in what is absolutely one of the most dangerous places in our homes. But there are a lot of things we can do to minimize the risk of injury in the bath. And many of these precautions are especially important for the very young and the very old.

Safety bars — or grab handles — and non-slip mats inside the tub or shower are just two of the most effective — and most common — ways to stay safe in our soapy havens.
